Typed rules, evidence-gated quotes, human-gated learning
typed rule
hard · hybrid · soft
verifier
locates the span
LLM
quotes inside it
evidence
gate
deterministic
verdict
the learned layer feeds the next review
hard — the verifier decides; absence is evidence
hybrid — the LLM judges, but only a located span
soft — a pending item for the expert; never counted
expert decides
accept / dismiss / rewrite
learned layer
audited, reversible
no finding without a rule and a location • no absence claimed by the model • no verdict from the model • no tier promotion by the system
